

单面

The true wireless earbuds support AI intelligent voice wake-up technology, which is a human-machine interaction technology that enables our better control on device connected. When we say "Hi SoundPEATS", "Accept Call" or "Reject Call", the device will act accordingly.

Say "Hi SoundPEATS" when not on the phone	Activate voice assistant
Say "Accept Call" against an incoming call	Answer the phone call
Say "Reject Call" against an incoming call	Decline the phone call

" Hi SOUNDPEATS"

Note: You can't hang up the call by voice control.
